

CHRISTIAN R. ORTEL

SENIOR DATA ANALYST | AI / ANALYTICS ENGINEER

Tampa, FL | (518) 925-7498
christian_ortel@yahoo.com
linkedin.com/in/christianortel | github.com/christianortel

Senior data analyst with experience across financial-services risk, reporting automation, applied AI, and stakeholder-facing analytics. Builds practical systems with SQL, Python, Snowflake, RAG workflows, Tableau, and Power BI.

PROFESSIONAL EXPERIENCE

Citi Bank N.A. | AVP - Data Science Senior Analyst

Tampa, FL
Jan 2023 - Mar 2026

- Automated monthly ICRM stakeholder reporting with a Python and pandas ETL over Jira sprint data and KPIs, reducing a four-week manual workflow to about ten minutes.
- Supported a Gemini RAG workflow that generated SQL from plain-English questions over a 1.5M-row Snowflake dataset, improving access for risk and compliance teams.
- Designed A/B prompt tests and stakeholder feedback loops to improve SQL reliability for non-technical users.
- Validated monthly UAT and Production Tableau dashboards and translated reporting requirements across business, risk, governance, and technical teams.

JPMorgan Chase & Co. (via mThree) | Production Support Analyst

Tampa, FL
Oct 2021 - Dec 2022

- Built Tableau and SQL reporting for real-time visibility into payment processing and automated a pre-deployment checklist with SQL and Excel VBA.

Nusr-Et | Accounting Analyst

Boston, MA
Aug 2020 - Sep 2021

- Built Excel pivot-table financial statements covering profit, expenses, and tax deductions; resolved billing and payment-processor issues.

TD Bank | Bank Teller I

Boston, MA
Aug 2019 - Mar 2020

- Supported account setup and closure, loan applications, customer relationships, and compromised-card resolution.

SELECTED ENGINEERING WORK

Onigiri | AI Engineer - Side Venture

Remote
Oct 2024 - Jan 2025

- Deployed a Llama 3.1 Twitter agent on a custom Python RAG framework and integrated CoinMarketCap data for market-sentiment publishing through the Twitter API.

iDecentralize Finance / WorldStar HipHop | Blockchain Developer / Software Engineer

Remote
Oct 2021 - Jul 2022

- Built Solidity ERC-721 contracts, Polygon token-gated trading access, Node.js backends, weighted-rarity NFT generation, and automated IPFS metadata publishing.

FOUNDER VENTURES

Tallownaise: Built a consumer food brand, product thesis, visual identity, and direct-to-consumer storefront around grass-fed beef-tallow mayonnaise. **Motionless Labs / Peptipedia:** Built a gated research catalog with lot documentation and a separate plain-language education site. **toxinmap:** Developing an interactive environmental-data globe for toxic releases and PFAS exposure context.

EDUCATION AND CREDENTIALS

Suffolk University - BS, Big Data & Business Analytics; Cybersecurity concentration
GPA 3.425/4.0 | Dean's List 2019-2021 | Trustee Scholarship | Transfer Excellence Award

Boston, MA
May 2021

Credentials: Google Data Analytics Professional Certificate (2026) | PCAP - Certified Associate in Python Programming (2025) | Florida 2-15 Life, Health & Annuity License (expires Aug 2026) | mThree Production Support (2021)

SKILLS

Data: SQL, Snowflake, Oracle, Teradata, Python, pandas, NumPy, data modeling | **Analytics:** Tableau, Power BI, Excel VBA, SAS, R, KPI reporting | **AI / Engineering:** RAG, Gemini, prompt evaluation, Git, Kubernetes, TypeScript, APIs
