PROFESSIONAL EXPERIENCE

Citi Bank N.A.

Assistant Vice President Data Science Senior Analyst

Tampa, FL

Jan 2023 – Mar 2026

- Built and maintained a monthly stakeholder facing report using Python and pandas to extract Jira sprint data, KPI updates, and operational metrics into a Powerpoint to communicate performance, and progress across all ICRM teams.
- Supported development of Gemini-based RAG workflow to generate SQL from plain English questions across a large enterprise dataset in Snowflake, improving data accessibility and insight for the risk stakeholders.
- Partnered with business, risk, compliance, and governance stakeholders to gather reporting requirements, clarify business questions, and translate technical data into clear insights, KPIs and summaries for non technical teams.
- Acted as a liaison between business stakeholders and tech teams by documenting reporting needs, providing feedback on analytic outputs, and helped ensure deliverables were accurate, understandable and user friendly.
- Reviewed monthly UAT and Production versions of risk facing Tableau dashboards for reporting accuracy, validating outputs and communicating findings to business users and technical teams for correction
- Designed and ran A/B prompt testing/refinement to improve Gemini SQL output accuracy, increasing the reliability of the analytical output used by non technical teams for exploring the data.

JP Morgan & Chase Co.

Production Support Analyst

(Contracted by mThree)

Tampa, FL

Oct 2021 – Dec 2022

- Built Tableau and SQL reporting solutions to provide real-time data insights to our stakeholders.
- Developed an automated pre-deployment checklist for stakeholders using SQL and Excel VBA to ensure smooth onboarding to payment processing.
- Created various Excel datasets to assist with pulling metrics data and presenting information to stakeholders for concise explanations of best placement for needed resources.

iDecentralize Finance

Blockchain Developer

Remote

Oct 2021 – July 2022

- Shipped Polygon ERC-721 NFT collection that gated access to an arbitrage flash loan bot.
- Designed smart contract and backend stack using Solidity, OpenZeppelin library and Node.js.
- Deployed Llama 3.1 powered Twitter agent with custom python RAG framework.
- Integrated CoinMarketCap API to fetch real-time market data to post market sentiment analysis via Twitter API.
